

# STOCK GRIDS

## Hytek Stock Grid

This sturdy stock grid is manufactured by Hytek Concrete Australia in Renmark in South Australia. The grid has an axle load rating of 14 tonne and each module weighs 2 tonne and is made from 40 mpa concrete. It is easy to clean by simply using the handle of a shovel or using water and a fire fighting pump. Used extensively in the Mildura area, the grids are cost effective and will last a lifetime. Engineers specifications and reports are available, upon request.

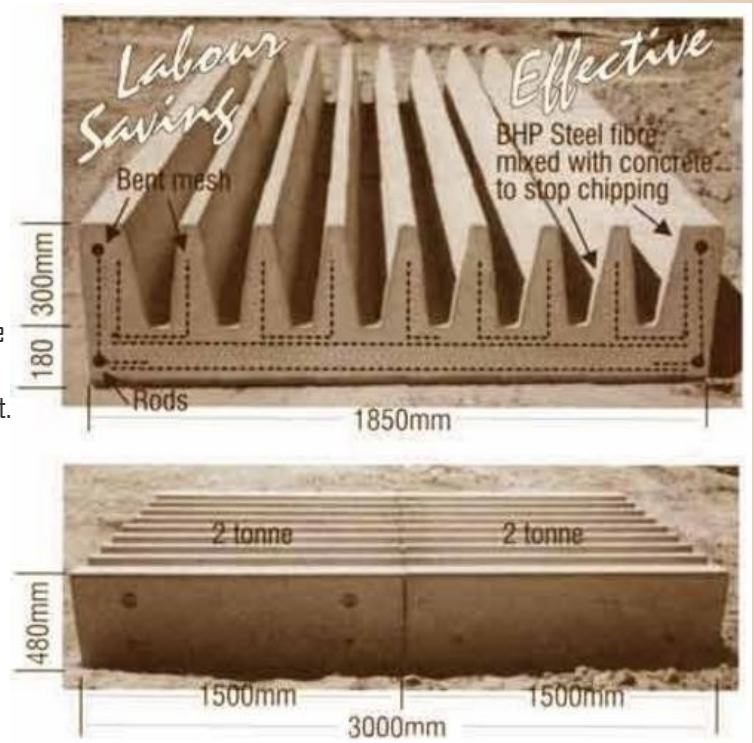

222 Kuhlmann Road Renmark, SA

PO Box 1 Renmark 5341
